

Correction to “Transient flow in bounded randomly heterogeneous domains, 1, Exact conditional moment equations and recursive approximations” by Daniel M. Tartakovsky and Shlomo P. Neuman

In the paper “Transient flow in bounded randomly heterogeneous domains, 1, Exact conditional moment equations and recursive approximations” by Daniel M. Tartakovsky and Shlomo P. Neuman (*Water Resources Research*, 34(1), 1–12, 1998), a minus sign is missing in front of the leading integral in (B9), (B11), (52), and (53). Appendix A contained several typographical errors. In particular, the equation preceding (A3) should read $L_{t,x}h = -f - \mathcal{R}_{t,x}h$; (A3) should read $h = -L_{t,x}^{-1}f - L_{t,x}^{-1}\mathcal{R}_{t,x}h + \hat{h}$; the equation preceding (A5) should read $h_0 = -L_{t,x}^{-1}f + \hat{h}$; and a minus sign is missing in front of the integral in (A7).
